

DANIMEX SOLUTIONS USER CASE: INDUSTRIAL MINING

INTRODUCTION

At Danimex Communications, we understand the unique challenges of the mining industry.

Our comprehensive communication solutions are designed to enhance safety, efficiency, and reliability in even the most demanding environments. From robust two-way radios to advanced satellite communication systems, we provide the tools you need to keep your operations running smoothly. Trust Danimex to deliver the connectivity that powers your success.

COMMAND AND CONTROL

Our command and control solutions ensure seamless communication across your mining operations. With TRBOnet, you get a powerful dispatch system that integrates with DMR and PoC (push to talk over cellular) technologies. Our SIP interface connects your communication network to the outside world and standard telephone lines, ensuring uninterrupted connectivity.

- » Avigilon tracking provides real-time data.
- » Our ATEX and IS SA certified solutions guarantee safety in hazardous environments.

When things go wrong - Collapse and rescue

When emergencies strike, Danimex is there to support your rescue efforts.

Our SAVOX hardline cameras and communication systems are essential for both rescue operations and maintenance tasks.

We also offer SYBET rescue solutions, combined with Avigilon analytics, help you track personnel and ensure their safety.

Staff Protection

In the mining industry, workers are regularly exposed to hazardous noise levels from heavy machinery, drilling, and blasting operations. Protecting your team's hearing is not only a legal requirement but a critical investment in the safety, health, and productivity of your workforce.

Our high-quality hearing protection solutions are designed to provide maximum protection against harmful noise while ensuring comfort and durability in challenging environments. Whether in underground mines, surface operations, or processing plants, our solutions help safeguard your employees from noise-induced hearing loss and fatigue.
