ICT TOOL KIT

The Milwaukee Packout Trolley System is a versatile and rugged storage solution that combines mobility with customisable organisation.

Key Features:

- » *The system consists of four stackable components – a robust trolley base with all-terrain wheels and three durable toolboxes. Each unit can be securely clipped together or used individually, allowing you to take only what you need for the task at hand.*
- » *Constructed from impact-resistant polymers and rated IP65 for protection against water and dust, your tools will stay safe and dry, no matter the conditions.*
- » *With a load capacity of up to 113kg, the trolley is designed to carry a heavy load while remaining easy to manoeuvre, even across uneven surfaces.*
- » *Whether you bring the full stack or just a single box, the Packout system lets you organise your tools and accessories in a way that suits your needs. There is plenty of space, and the layout is entirely up to you.*

This system is not just about storage. It is about smarter working.
