

SMC Gateway V2 products

Make your radio smarter

GATEWAY V2

Create your own applications and custom solutions using the Node Red simple workflow tool and the Behaviours cause and effect tool. Does not include any finished applications. Allows you to licence and protect your creations.

Support on this product is limited to hardware, software support can be arranged at additional cost, but must be scheduled in advance.

Software Features:

- Node Red Tool
- Behaviours simple cause and effect tool
- Create and package custom applications to run on the OEM version.
- Licence your own apps
- Fully documented API

Hardware features:

- 20 digital inputs/outputs
- 2 RS232
- 2 TTL ports
- 1 opto-isolated full RS232
- 3 USB
- Dual LAN & WAN ethernet
- 9-28V DC power
- Analogue audio in/out

Supported radio systems:

- MOTOTRBO DM4000
- Hytera MD655 (T2 & 3)
- Hytera RD625/985
- Kenwood NX3000/5000
- ICOM dPMR
- Simoco 600 series

DMX-2019-01

REACTZ - ALARM MANAGEMENT

30 second setup wizard supporting major BMS, intruder and fire alarm systems, as well as WiFi buttons, hard wired inputs, MOXA ioLogik devices and more.

Supports messaging to two-way radios, SMS and email.

Features:

- GPIO input/outputs
- Serial data
- TCP/IP
- MOXA ioLogik
- WIFI Buttons
- SMS (via Internet)
- SMS (via USB adaptor)
- Text parsing (regex)
- Simple text parsing tool
- Input power monitoring
- Radio text back test
- Self managed distribution list
- Email zero-config
- Email SMTP

Supported radio systems:

- MOTOTRBO DM4000
- Hytera MD655 (T2 & 3)
- Hytera RD625/985
- Kenwood NX3000/5000
- ICOM dPMR
- Simoco 600 series

TASKZ - HYTERA TASK DISPATCHER

TaskZ is a hardware and software solution that works with Hytera's work order feature to manage the allocation of work orders also known as job tickets.

Features:

- Networked, browser application
- Unlimited operators
- Up to 50 field radios
- Uses Hytera's proprietary job ticketing system
- Simple to use for operators and radio users
- Reporting engine with export facilities
- Ad hoc text messaging

Supported radio systems:

- Hytera MD655
- Hytera RD625/985

RECORDZ- CALL RECORDING

Audio call recording for one or two attached radios. Records all received traffic and tags recordings with date, time, duration and radio idents.

Features:

- Networked, browser application
- Unlimited operators
- Unlimited field radios
- Built-in storage for ~12 months
- Download recordings
- External backup options
- Data protection act compliant with auto-deletion & secure access

Supported radio systems:

- MOTOTRBO DM4000
- Hytera MD655 (T2 & 3)
- Hytera RD625/985
- Kenwood NX3000/5000
- ICOM dPMR
- Simoco 600 series

TRACKZ - LOCATION TRACKING

Simple location tracking for radio systems, supporting multiple radio manufacturers.

Features:

- Networked, browser application
- Unlimited operators
- Custom mapping
- Unlimited field radios
- Multiple radio systems
- Offline mapping

Supported radio systems:

- MOTOTRBO DM4000
- Hytera MD655 (T2 & 3)
- Hytera RD625/985
- Kenwood NX3000/5000
- ICOM dPMR
- Simoco 600 series

OEM GATEWAY V2

Runs custom made modules and work flows created with a full Gateway V2. This version includes no tools to build apps or finished products and is intended for customers to load their own custom applications, or load a licence to enable one of the other products. Please contact us about branding options on the hardware.

Supported radio systems

- MOTOTRBO DM4000
- Hytera MD655 (T2 & 3)
- Hytera RD625/985
- Kenwood
- ICOM
- Simoco 600 series
