

PanzerNode

The PanzerNode by Sybet International is a rugged, portable wireless mesh network node designed for underground communication networks in mining and hazardous environments.

It is engineered for reliability, easy deployment, and robust operation in harsh conditions.

Technical specification

For a detailed overview of the product’s capabilities, please see the key features listed below. These highlights will provide you with a comprehensive understanding of the advanced functionalities and benefits that our product offers.

SPECIFICATION

FEATURE	DESCRIPTION
Device Type	Rugged wireless mesh network node
Application	Underground mining, industrial environments
Power Supply	Hot-swappable batteries
Connectivity	Wireless mesh, integrates with Sybet devices
Communication	Real-time voice and data, automatic routing
Enclosure	Heavy-duty, sealed, shock-resistant
System Role	Mesh network node, data/voice relay
