

C-C200

Tactical Push-to-talk unit

Streamlined, versatile and reliable

ROBUST PTT CONTROLLER FOR TACTICAL OPERATIONS

Optimized form and usability, yet compact for tactical use in demanding conditions. Compatible with prevalent PMR and tactical radios, combines acclaimed audio quality with excellent accessibility. Innovative secure push-to-talk function with protected push-button design eliminates incidental activation. Great tactical feel in addition to silent operation for stealth tasks. Easy to fit on gear vest with versatile clip-on fixture options, QR4 headset connector as default, NATO-wiring.
