

# GOAL ZERO - POWER STATIONS

## YETI 1000X

### YETI 1000X

Run your essential devices and appliances with the Yeti 1000X. Our most versatile sized power station is big enough to power medium to large appliances and portable enough to pack in the car and go with you anywhere. Upgraded to include USB-C Power Delivery, integrated MPPT for increased solar charging efficiency, and faster recharge times. Power phones, laptops, camera equipment, portable fridges, medical devices, TV's, and more.

### Goodbye Gas Generator. Hello Yeti X

With a lithium-ion battery at its core, the Goal Zero Yeti X equips you with safe, clean, portable power for camping, tailgating, off-grid events, workshops, and emergency power during an outage.

### Faster Charging from the Wall

Yeti 1000X offers up multiple recharging options. Included 120W Power Supply plugs into the 8mm charging port to recharge the Yeti in 9 hours. Industry-leading 600W High Power Port lets you recharge in as little as 2 hours using the Yeti X 600W Power Supply (sold separately).

### Versatile Port Options

Power a wide range of devices with seven different port options including fast-charging 60W USB-C Power Delivery, multiple USB-A ports, regulated 12V, and two 120V AC ports.

### Experience Unlimited Power

Charge the Yeti 1000X from the sun with our portable solar panels while away from the grid, and keep it topped off from a wall outlet when you're home. Integrated MPPT charge controller ensures you're getting the most efficient solar charge possible.

There are many options available with the Nomad or Boulder panel range</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| Three ways to charge                                                                                                                                                                                                                                               | <p><b>From the Sun</b> - Recharge from the sun by connecting a compatible solar panel. Charge times are dependent on the size of the solar panel. The Boulder 100 Briefcase will provide 100W of solar and fully recharge the Yeti 1000X in 12-24 hours</p> <p><b>From the Wall</b> - Plug it into the wall. Fully recharges in 9 hours using the included 120W Power Supply AC Wall Charger. Not quick enough? Drop your recharge time to 2 hours using the available 600W Power Supply or 4.5 hours with the 230W Power Supply</p> <p><b>From the Car</b> - The Goal Zero Yeti 1000X can be charged by plugging into your 12V adapter using the Goal Zero Yeti Lithium 12V Car Charging Cable.</p>                                                                                                                  |                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
